Whitepaper V2

September 20, 2022

Introducing the freshest MATIC Staking Platform to hit Decentralized Finance in years, **Mango Miner MATIC**, brought to you by the **Mango Finance Team**! This project is being developed by a cross-cultural team of dedicated DeFi enthusiasts that span the globe. They have come together to develop the hottest new staking platform that offers the juiciest ROI's, while mitigating investor's risk using an immutable Smart Contract on the Binance Smart Chain, which will be audited by the most trusted Smart Contract Code Auditors in DeFi. Using some clever solidity code, we have created a **Sustainable Passive Income Generating Staking Protocol** that will earn our investors a sustainable 8% daily Return on Investment (ROI) using our investment bots. Mango Miner income will NOT strictly be generated by our investors. We have a **6 Phase Business Strategy** in place in order to build upon the platform, and to open up further income opportunities for all, while helping the less fortunate along the way.

Phase 1 – August 31, 2022: Mango Miner BUSD Launch day. 8% Daily ROI BUSD Staking DAPP open to investors. ✓

Phase 2 - September 2022: Initial project profits will be re-invested into an intensive marketing campaign through paid social media ads, Telegram, Moonarch, DappRadar, Youtube Influencers, Bloggers, and affiliates. ✓

Grow Mango Finance Team! *New Marketing/Promo Team Member added Sept 8, 2022* ✓

Mango Miner MATIC Launch! Monday *September 26, 2022 18:00 UTC*

Phase 3 – October 2022: Mango Miner Tropical Themed Roulette Game, 50/50 Coin Flip Game, and Mango Miner Daily Lottery. Profits from these gaming DAPPS will be directly injected into the project TVL (Total Value Locked) via an additional immutable Smart Contract.

Phase 4 – November 2022: At this point we plan to launch the Mango Finance Ecosystem, which will see the launch of Mango Miner BNB, Mango Miner AVAX, Mango Miner Solana, and more.

Phase 5 – December 2022: December is a month of rest, celebration, family, and of giving. The Mango Finance CEO will donate 25% of the overall profits to charitable causes for at-risk street youth, animal shelters, and rural poverty in an undetermined Latin American country. Proof will be uploaded to social media platforms.

Phase 6 – 2023: 2023 will bring all of the Mango Finance projects together and will introduce a token into our ecosystem, which will further help raise and sustain the TVL for our miner projects. The team will also hold an art competition (with a large BUSD reward) to see who will create the art for our first NFT project in 2023.

Minernomics

8% Daily ROI: It's a sustainable ROI with high-growth potential offering a Medium Risk - Medium Reward investment. Compared to some other insanely high ROI projects, 8% is more sustainable long term.

Buying Mango Farmers: Farmers do not have a set price. A higher TVL will mean more Farmers per MATIC, while a Lower TVL will mean fewer Farmers per MATIC. This creates a fair playing field so no user can be late to the project.

Daily ROI: DailyROI is up to 8% depending on in Mango Eating habits, the time of day investors re-plant their mangos, and it also depends on deposit and TVL fluctuations.

Harvesting Mangos: Harvesting habits affect user rewards, if you eat mangos too often, your daily ROI will drop. If you only start with a small deposit, it will take time to display, as the DAPP only goes to 3 decimal places. If harvest your mangos too often, your daily ROI will drop dramatically. This is the anti-whale mechanism that prevents a whale from draining the TVL!

Minernomics

Re-Planting Mango Seeds - Re-planting is the same as compounding, so the more often you do it, the better your daily ROI will be. You will need to pay standard MATIC gas fees for every mango seed replant!

FAQ

Can I get my original MATIC investment back? Mango Miner MATIC is a LOCKED REWARDS POOL - this means that your initial investment is locked in the Smart Contract, and you will ROI on the long-term by Re-Planting your Mango Seeds!

What are the fees? There is 3% dev fee and 5% marketing fee taken from ALL deposits. There is also a 4% marketing fee on Withdrawals. There is also a 4% owner fee on compounding.

FAQ

Can I get my original MATIC investment back? Mango Miner MATIC is a LOCKED REWARDS POOL - this means that your initial investment is locked in the Smart Contract, and you will ROI on the long-term by Re-Planting your Mango Seeds!

What are the fees? There is 3% dev fee and 5% marketing fee taken from ALL deposits. There is also a 4% marketing fee on Withdrawals. There is also a 4% owner fee on compounding.

What is the best strategy? We STRONGLY recommend the tried and tested 6:1 method! Investors will Re-plant (compound) as many times as they want for 6 days, and then harvest for 1 day a week. Using this method you SHOULD see your initial investment back within 6-10 weeks!

Security & Audit

What prevents the devs from rugging? The contract is immutable up for anyone to see on Polygonscan, Therefore cannot be changed or altered in any way shape or form. It is also audited and verified!

Can contract functions be added? No, the contract is immutable and cannot be changed! The contract works perfectly well as it is. No wallets can be blacklisted, no automated forcing people to re-plant 6 days and harvest 1 day a week. Nothing can be changed as the contract is deployed and ownership will be renounced.

Does it have an anti whale mechanism? The contract has an in-built anti-whale mechanism. For Example: User 1 re-plants 6:1 and gets the highest ROI. User 2 does 5:2 and gets a lower ROI. User 3 does 4:3 and gets an even lower ROI. This happens all the way until the user who constantly EATS has their ROI drop down to only 0.5% a day. This is to prevent 1 user from draining the TVL, creating a more sustainable project for everyone!

*Remember, due to the nature of the smart contract, an 8% daily ROI cannot be guaranteed! Only invest in DeFi projects what you can afford to lose!
